Step 1: Narratives
Step 2: Claims
No Narrative Found
Wind energy causes (or will cause) significant and/or under-addressed harm to wildlife, animals, ecosystems and/or the environment.
Wind energy is bad for communities.
Wind energy is too expensive. It has negative economic impacts and costs too much to produce.
Selected
Wind energy is inefficient, unreliable, and can't meet demand.
Wind energy development is poorly regulated and badly governed. Poor governance often stems from inappropriate or harmful policies.
Selected
Wind energy development

C_0_0 : No Claim Found
C_0_1 : It's opposition, but not one of these claims
C_1_0 : Wind energy threatens wildlife and animals, ecosystems, and biodiversity.
C_2_0 : Wind energy will not help meet (or are inefficient for meeting) climate change goals.
C_3_0 : Wind turbines are unsustainable and not environmentally friendly. They generate an unsustainable amount of waste and pollution, contaminate water supplies, and are not recyclable.
C_4_0 : Wind turbines take up too much space.
C_5_0 : Communities oppose wind energy. The text explicitly states that communities, the public, or local residents are against wind energy development.
